OsSong and Beat Buddy set-up

1) Make sure Blueboard app is running, and Blueboard is connected.
2) Beat Buddy Settings, as follows:

Main Pedal>MIDI Settings

      MIDI In>System Real Time>Sync>Enabled
                         Start> Enabled
                         Stop> Enabled
         MIDI Channel Number > All
         Note On > Disabled
         Control Change> Enable All

      MIDI Out
         Output Type>MIDI Merge
         Channel > Channel 5
         Sync>While playing
         Start> Intro
         Stop> Pause and End
         Notes> Disable
         Next Part> Disable
         Time Sig> Enable

    Cue Fill Period > Next Measure

    Footswitch>   1st stopped >song back
                     1st paying >outro fill
                     2nd stopped > song advance
                     2nd Playing >pause/unpause

3) OnSong Settings
    Gear>Editors>Midi>Wrench>Sources>Connect bluetooth, then activate BT01
    Gear>Editors>Midi: Program Change 4 on Channel 1 Scroll up
                         Program Change 5 on Channel 1 Scroll down

    Gear>EditosMidi>Wrench
        Midi enable on
        Virtual Midi on
        Tempo > ch. 5
