

Evening Star

Kenny Rogers

(verse 1)

                  G                                  D  
If you never rode West of, the Arizona border,  
                                  G                                  C/G  
You can turn the other way,boy, but you never get far,  
                                  G                                  C/G  
You be living a lie, if you wanna see the wonders of the age,  
                  G      D                                  G  
You must follow, the evening star,

(chorus)

                  G                                  D                                  G  
Evening star, shine a little Heaven on a stranger with no dream,  
                  D  
Where you are, you can see the loneliness I mean,  
                                  G                                  D                                  G                                  C/G                                  G  
And if I gotta fight, I can never play, somebody else's game,  
                                  D                                  G      D                                  G                                  C/G                                  G  
I can follow the evening star, starlight, you never need somebody else's name,  
                                  D                                  G  
If you follow the evening star,

(verse 2)

                                  G                                  D  
Have you ever known a sunset, when the sky's on fire,  
                                  G                                  C/G  
How you end another day,boy, you be searching too far,  
                                  G                                  C/G  
Like the desert I rode on, any memory is lost in the restless wind,  
                  G                                  D                                  G  
I just lie beneath, the evening star,

(chorus)

          G                                  D                  G  
Evening star, shine a little Heaven on a stranger with no dream,  
          D  
Where you are, you can see the loneliness I mean,  
          G                  D                  G          C/G          G  
And if I gotta fight, I can never play, somebody else's game,  
          D                  G          D                          G          C/G          G  
I can follow the evening star, starlight, you never need somebody else's name,  
          D                  G  
If you follow the evening star,

(verse 3)

                  A                                  E  
Have you ever held a woman, in the California moonlight,  
                  A                                  D  
Put your money on a good night, if you never been there,  
                  A                                  D  
It's a sight for sore eyes, if you wanna see the wonders of the age  
          A                  E                  A  
Making love beneath, the evening star

(chorus)

          A                                  E                  A  
Evening star, shine a little Heaven on a stranger with no dream,  
          E  
Where you are, you can see the loneliness I mean,  
          A                  E                  A          D/A          A  
And if I gotta fight, I can never play, somebody else's game,  
          E                  A          E                          A          D/A          A  
I can follow the evening star, starlight, you never need somebody else's name,  
          E                  A  
If you follow the evening star.
