

Evening Star  
Kenny Rogers

[Verse 1]

                                  G  
If you never rode West of  
                  D  
The Arizona border  
                                  G  
You can turn the other way, boy  
                          C/G  
But you never get far  
                          G  
You be living a lie  
                          C/G  
If you wanna see the wonders of the age  
                  G  
You must follow  
D                          G  
The evening star

[Chorus]

                  G  
Evening star  
                                  C/G  
Shine a little heaven on a stranger with no dream  
                  D  
Where you are  
  
You can see the loneliness i mean  
                  G                  D  
And if i gotta fight, I can never play  
G          C/G          G  
Somebody else's game  
                  D                  G  
I can follow the evening star

Starlight, you never need somebody else's name  
If you follow the evening star

[Verse 2]

Have you ever known a sunset  
When the sky's on fire  
How you end another day, boy  
You be searching too far  
Like the desert I rode on  
Any memory is lost in the restless wind  
I just lie beneath  
The evening star

[Chorus]

Evening star  
Shine a little heaven on a stranger with no dream  
Where you are  
You can see the loneliness i mean  
And if i gotta fight, I can never play  
Somebody else's game
